

# Curriculum Outcomes

Scientific Knowledge, Learning & Understanding

Working Scientifically

Question, plan, predict, record, present & conclude in a variety of ways.

Curiosity to Investigate the Natural World

## Why is Science important?

Makes us inquisitive, curious and be able to question.

To help generate solutions for everyday life and helps us to answer the great mysteries of the universe.

To increase our knowledge and helps us be more observant.

## Potential Careers

Vet
